DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1 and 5-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Referring to claim 1, there is insufficient antecedent basis for the limitations “the highest place”, “the uncorrected probability of winning”, “the subsequent place” and “the whole processing.”

Referring to claim 5, there is insufficient antecedent basis for the limitations “the uncorrected probability of winning”, “the subsequent place” and “the whole processing.”

Referring to claim 6, there is insufficient antecedent basis for the limitation “the highest probability of winning.”

Referring to claim 7, there is insufficient antecedent basis for the limitations “the highest probability of winning”, “the uncorrected probability of winning”, “the subsequent place” and “the whole processing.”

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Art Unit: 3714

Claims 1-10 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The claimed invention appears to be a mathematical algorithm performing calculations or data manipulation that indicates a result which lacks providing a useful, concrete and tangible result, there from. See *State Street Bank & Trust Co. vs Signature Financial Group Inc.*, 47 USPQ 2d 1596, 1601-02 (Fed Cir 1998). Specifically, the claimed invention appears to be non-functional descriptive material that is not in combination with a computer system so as to impart functionality of steps thereto.
